Job description

Junior Project Manager (PLC Programming Experience)

Position Overview:

We are seeking a talented and motivated Junior Project Manager with PLC (Programmable Logic Controller) programming experience to join our dynamic team. The ideal candidate will play a crucial role in managing and coordinating projects related to wind energy systems, with a focus on PLC programming and automation.

Responsibilities:

Collaborate with senior project managers to plan, execute, and monitor wind energy projects from initiation to completion.

Assist in developing project plans, timelines, and budgets, ensuring adherence to project objectives and deadlines.

Coordinate with cross-functional teams, including engineering, procurement, manufacturing, and installation, to ensure seamless project execution.

Utilize PLC programming skills to design, develop, and implement automation solutions for wind turbine control systems.

Conduct risk assessments and develop mitigation strategies to address project challenges and uncertainties.

Monitor project progress, identify potential issues or bottlenecks, and take proactive measures to resolve them.

Prepare and present regular project status reports to stakeholders, highlighting key achievements, milestones, and areas for improvement.

Ensure compliance with regulatory requirements, industry standards, and safety protocols throughout the project lifecycle.

Support continuous improvement initiatives by analyzing project performance metrics and identifying opportunities for optimization.

Stay updated on emerging technologies, trends, and best practices in wind energy and PLC programming to drive innovation and efficiency.

Requirements:

Bachelor's degree in engineering, computer science, or a related field. Advanced degree or relevant certifications is a bonus.

Proven experience in project management, preferably in the renewable energy sector.

Strong understanding of PLC programming languages (e.g., ladder logic, structured text) and experience with PLC hardware/software (e.g., Siemens, Allen-Bradley).

Familiarity with automation systems, SCADA (Supervisory Control and Data Acquisition), and HMI (Human-Machine Interface) software.

Excellent organizational, time management, and multitasking skills, with the ability to prioritize tasks effectively in a fast-paced environment.

Exceptional communication and interpersonal skills, with the ability to collaborate effectively with cross-functional teams and stakeholders.

Analytical mindset with a keen attention to detail and problem-solving abilities.

Knowledge of project management methodologies (e.g., Agile, Waterfall) and tools (e.g., Microsoft Project, Jira) is a plus.

Commitment to safety, quality, and sustainability principles.

Willingness to travel occasionally to project sites as required.
