Lead D365 CE Technical Consultant

[Apply Now](#)

Company: Focus Cloud

Location: United Kingdom

Category: computer-and-mathematical

I'm looking to speak with Dynamics CE Technical Consultants regarding multiple opportunities at a Microsoft-only consultancy. Being focussed solely on Microsoft means that they have industry-leading experts from top-to-bottom, ensuring astute delivery and investment in the right places at the right time.

From a seniority perspective, I'm keen to speak with Consultants who have strong experience leading technical workstreams (preferably enterprise-level) from both a management and hands-perspective. You will be competent on the core modules of Dynamics CE (Sales, Service, Marketing) though if you have experience working with either Field Service, Project Ops or Power Pages (including slightly older versions) that will be hugely preferred.

You will go through a highly tailored and personalised interview process to understand how your skills can be utilised effectively from day one to ensure a seamless bedding in period, resulting in a promotion rate nearly 15% ahead of the market average.

If you're keen to explore how we can facilitate a role morphed to your strengths and designed to work on areas for further development when not billable, please reach out to edward.collins@cogntiive-group.com to discuss further.
