### Job Description

Lead Delivery Engineer Role available-

This is a great opportunity for a Lead Delivery Engineer to join a established main contractor in a long term contract on an existing project including Track drainage, managing delivery engineers and Heavy Civils in on the London Underground.

The company is a well recognised market leader who builds, develop, maintain and operates complex infrastructures while maintaining strong H&S values. Your Lead delivery engineer role will be responsible for looking after and overseeing the delivery elements of the project while working and managing teams of 2/3 delivery engineers who will report directly to you. The company will offer longevity in the project with the initial contract being a year with the option to extend for the right candidate. They are recognised for their great culture which puts their employees first.

Key responsibilities will include:

- Reviewing designs for Track Drainage.
- Managing and leading 2/3 Deliver Engineers.
- Logging results through office paperwork.

Experience required for this role:

- Experience on Track projects.
- Working in a strong team environment.
- Experience working towards deadlines when reviewing designs.
- Proven track record of working in paperwork based roles.

Package offered for the Lead Delivery Engineer Role:

- £400 to £450 inside IR35.
- Long term contract with option to extend after 1 year.
- Hybrid work.
