## Lead Planning Engineer

Woking, England, United Kingdom (Hybrid)

Role: Lead Planning Engineer

Salary: £75k - 90k (Negotiable) Depending on Experience

Location: Woking (Hybrid working)

Our client, a global energy services company with over 40 years of experience in oil and gas, and 10 years in offshore wind, is seeking to recruit a Lead Planning Engineer based in Woking on a Hybrid basis.

### Key Responsibilities

Leads planning for Consultancy group responsible for planning on FEED and Detailed Design projects. Capable of producing FEED and EPC schedules with appropriate logic. The Lead planner will support projects as well as managing the other planners.

The Lead Planner Undertakes Project planning services on projects and proposals, in accordance with information approved by the Project Manager/Project Proposal Manager. Capable of checking the work of other Planning Engineers. Responsible for providing planning expertise to create and analyse schedules, where possible supporting and communicating project schedule issues potentially impacting the project to the Project Control Lead, Project Manager or Project Proposal Manager.

The Planning Engineer will lead the planning team.

Corporate reporting line is to the respective Departmental Group Manager.

Focal point for all planning activities. Lead the planning department for Consulting and manage other planners.

Set corporate procedures and processes.

Analyse detailed project requirements and prepare the project master schedule which integrates strategies and constraints for all project phases. Able to perform planning services in a reliable and responsive manner.

Prepare EPC schedules for future phases as part of FEED and Detailed design delivery.

Monitor and report progress against schedules using required elements of the integrated project control system and in line with contractual requirements.

Prepare manpower loading and work breakdown structure.

Prepare project reporting for engineers, schedule risk analysis, progress and corrective actions and critical path analysis.

Prepare and maintain progress curves for each project phase in accordance with the Project Control Plan, including baseline and forecast curves.

Support the use of a document level progress measurement system and operate the performance measurement systems

In conjunction with the projects material control group, prepare and maintain, a requisition tracking system that meets the requirements of the Project Control Plan.

Prepare and where appropriate, make presentations to project teams and client on schedule control methodologies and procedures used by the company.

Support Sales and Proposal groups in the preparation of proposals as appropriate.

Review and check work carried out by other Planners.

Ensure compliance with ISO Quality procedures, Project Quality Plan and Design Integrity processes and procedures. Comply with other accredited frameworks such as ISO 14001.
