Company: microTECH Global Ltd

Location: United Kingdom

Category: architecture-and-engineering

Stress Engineer

Duration: 12 months

Location: Bristol (3 days on site per week)

Start Date: ASAP

OUTSIDE IR35

A client based in Bristol is looking for several Stress Engineer for the Aerospace/Avionics industry. This will be for an initial 12 month contract.

The candidate will be working on high end design for the new cutting edge air taxi, with a vertical take-off.

The candidates must have or be able to obtain SC Clearance.

- Experience in the analysis of aerostructures design, development, projects with hands-on metallic and composite structures analysis using FEA and classical hand analysis methods
- Good knowledge of aerospace materials knowledge, standards & specifications.
- Engineering activities in support of work to PDR for Wing / Empennage and boom aero structures. Both metallic and composite capability required with mix of experience to perform check for Analysis.

- Expertise in Hypersizer, HyperX is mandatory for composites design & optimization
- Review and finalize Concept design, implement detailed design & development, support on PDR activities and maturity, support qualification and production of composite and metallic components and assemblies
- Manage the execution of the work packages identified and ensure the convergence of the delivery plans with customer requirements.
- Define integrated design solutions for new components/assemblies and modifications to existing components (Composites and metallic).
- Optimize the design solutions, based on the correct balance of cost, quality, manufacturability, serviceability and performance.
- Coordinate with multi-functional teams to prepare drawings and other engineering data required for the manufacturing of the product and data submittal to the customer.
- To communicate effectively with co-worker, customer and suppliers
- Modelling, simulation and prototyping services.
