Lead Software Engineer

Apply Now

Company: QuEST Global Services Pte. Ltd

Location: United Kingdom

Category: computer-and-mathematical

Quest Global is an organization at the forefront of innovation and one of the world's fastest growing engineering services firms with deep domain knowledge and recognized expertise in the top OEMs across seven industries. We are a twenty-five-year-old company on a journey to becoming a centenary one, driven by aspiration, hunger and humility.

We are looking for humble geniuses, who believe that engineering has the potential to make the impossible, possible; innovators, who are not only inspired by technology and innovation, but also perpetually driven to design, develop, and test as a trusted partner for Fortune 500 customers.

As a team of remarkably diverse engineers, we recognize that what we are really engineering is a brighter future for us all. If you want to contribute to meaningful work and be part of an organization that truly believes when you win, we all win, and when you fail, we all learn, then we're eager to hear from you.

The achievers and courageous challenge-crushers we seek, have the following characteristics and skills:

Role Overview:

Lead Software Engineer to join our growing Software community to develop cutting edge embedded software in Combat Air Electronic Warfare domain

Job Responsibilities:

Provide Engineering Leadership to multidisciplinary team

Produce effective planning and report progress

Support Design and Gate Review activities

Develop embedded software, using RTOSs such as VxWorks or embedded Linux

Deploy software to multi-core or distributed hardware platforms

Work alongside firmware and hardware engineers to develop working embedded solutions

Use C++ and other scripting languages

Work to airborne software design standard RTCA 178C and coding standards such as MISRA C/C++

Skills, Qualifications and Experience required:

Full software lifecycle including: Requirements Management, Design, Implementation, Test and Integration

UML and C++

OOD (Object Oriented Design) techniques

Working and delivering software using agile techniques such as Scrum, and tooling such as Jira / Confluence / Bitbucket / Gitlab
