Together, we shape .

The O pportunity

We are looking for a Lead Software Engineer to lead a combined UK and india – based development team to ensure that the fundamental dev practices are being carried out to the highest level to ensure quality of delivery and adherence to committed timescales. We have recently secured an exciting project with a new client and have demanding roadmaps for investment in the growth of our platform to serve more clients all over Europe and possibly beyond!

Day-to-Day Responsibilities

Reporting into the Busines unit Director you will be responsible for the delivery and leadership of a first-class Software Engineering capability within the Retail & Hospitality sector, and a peer of the headsa of product, service and programme management.

Delivering Line Management responsibility of a large and growing delivery team.

Ensuring deliveries are consistent with Agile processes where possible.

Ensuring all team members are effectively trained with the skills required to perform their roles both now, and as part of a career development plan.

Working closely with the Retail & Hospitality Product Manager and PPM function to support the planning and capacity management of the team to ensure effectively delivery of releases to required timescales, cost and quality for all planned deliveries. This will include regular resource forecasting.

Working closely with the CTO Group to ensure any defined solutions align with the technical strategy.

Create, implement, and maintain a plan to address any variations in resource utilisation within the team.

Ensure the team have the right processes, technologies and support to deliver their planned work effectively regardless of international boundaries and time zone constraints

You will have the chance to travel to west midlands and other UK destinations in order to ensure the proper coordination of the projects

Who Are We Looking For

We look for big thinkers. People who can drive positive change, step up and show what's next – people with passion, can-do attitude and a hunger to learn and grow. In practice this means:

Signs of success:

You lead deliveries and ensure projects are resourced effectively and your team are supported and developed.

You are effective in client engagement and stakeholder management throughout

Previous Delivery Management experience across a multi skilled software delivery team,

ideally in an Agile environment.

Excellent client-facing and internal presentation skills, including working with senior stakeholders

Pragmatic, still highly organized and structured.

Result oriented with a hands-on mentality, with a commitment to continuous improvement and self-development.

You can demonstrate effective resource utilisation and timely delivery of projects within the agreed cost budgets.
