The Chiltern Lift Company

Furlong Road, Wooburn Green, Bourne End SL8 5DG, UK £38,000.00 - £45,000.00 DOE

Permanent Engineering

Welcome to Chiltern Lifts!

About Us

We opened for business in 1973. Today, the company is still managed by the original owners. As experts in 'all things lift', and passionate about excellent customer service, we offer reliable installation, maintenance and repair of commercial and residential lifts.

Unlike most lift maintenance companies, we don't charge a flat rate call out fee for clients that have maintenance contracts with us, just the hourly rate applies. We also don't believe in locking people in to long-term contracts. Instead, we offer flexible 12-month rolling contracts. From all types of stairlift or platform lift, to passenger and goods lifts in high rise buildings, our engineers are NVQ qualified and enhanced DBS checked. Most even started with us as home-grown, highly-trained apprentices, some have been with us for over 40 years!

Our Services

Whether it's a commercial or residential lift that you have you can be sure of the friendly and helpful customer service that you'd expect from a local, family-run business. No-one understands better than us just how important it is to you to keep your lift or stairlift working!

Lift Servicing and Maintenance – Correctly maintaining a lift is a necessary part of owning one, and owners/operators have certain obligations to fulfil to stay compliant with health and safety laws. We provide a programme of ongoing lift maintenance to ensure the smooth

operation of your lift all year round.

Lift Repairs It is inevitable that a lift will need to be repaired from time to time, even if it is correctly maintained. We have been carrying out lift repairs for all types of lifts for over 40 years, and would be happy to offer a competitive quote for any repair work your lift might be in need of.

Life Refurbishment and Moderation – Owners of older lifts often find that they don't comply with modern safety standards and that replacement parts become harder to find. We have many years of experience in lift refurbishment and modernization and would be happy to discuss how to bring your lift up to date.

Supplementary Lift Testing – All lift owners are required to have their lifts inspected every 6 or 12 months. Occasionally these thorough examinations result in additional tests known as supplementary tests being needed. We specialise in supplementary lift testing and would be happy to discuss your needs.
