Machine Learning / AI Developer – London | Hybrid - £70,000 - £90,000 I'm working with an AI-first agency based in London working with Machine Learning and Artificial Intelligence to help clients in the technological space innovate and create real-world impact. Having started in 2017, they've been pivotal in working with companies within the Manufacturing and technological spaces, boasting some 60 key accounts within the UK and Benelux regions. Having recently onboarded a Director of Machine Learning, they're now looking to build a team who will gain the benefit of his experience and knowledge. They're currently hiring for 3 Machine Learning / AI Developers from a mid – senior level to work alongside him and within their larger IT team of 14. Within the role, you'll have a chance to really flex your skills, building innovative solutions, refining machine learning models within a production setting, and collaborating across the broader, cross-functional IT team. Key responsibilities will include: and optimising machine learning models tailored to client needs. with teams and clients to solve business challenges using data-driven solutions. and deploying machine learning solutions into production environments. updated on the latest advancements in data science and machine learning – the business offers plenty of time to continued learning and development and maintaining the performance of deployed models, ensuring data privacy and security compliance. Key competencies needed: in data science and Machine Learning Learning specifics: NLP, LLMs, TensorFlow, PyTorch with data wrangling and preprocessing with DevOps / MLOps experience for model deployment with either AWS or GCP For more information on this opportunity, please submit your latest CV to david@neartechsearch.com or apply!
