I am currently recruiting a Maintenance Engineering Supervisor for my market leading client within the automation sector.

As an Maintenance Engineering Supervisor you will lead the engineering team. With a focus on H&S, KPI's and performance management, this position is a key role for the success of this global automation business.

Key responsibilities;

- * People management.
- * Performance reviews, development and coaching of team, dealing with employee relations issues, and employee welfare and wellbeing.
- * H&S Management.

- * Enable the creation and implementation of standard ways of working.
- * Effective escalation management.
- * Engineering Planning.
- * Attend daily meetings & liaise with operations to ensure workload is prioritised correctly.
- * Organise improvements, repairs and modifications.
- * Project / Installation work.
- * Compliance audits.
- * Parts management.
- * Deputise for Site Manager in periods of absence.

Experience Required;

- * Strong people management skills.
- * A recognised engineering qualification, ideally HNC or above.
- * Hold an IOSH or similar H&S related certificate & adhere to all company/ customer legislative and H&S procedures
- * Recognised apprenticeship in an engineering field would be desirable.
- * Experience of managing teams.
- * Computer Literate.

Application Process:

If you have the above skills and wish to be considered for this position or find out more details then please submit your CV
