

Manual Tester

[Apply Now](#)

Company: Qualitest

Location: United Kingdom

Category: computer-and-mathematical

The Test Coordinator is responsible for coordinating and managing all aspects of software testing within a project. This role involves planning, executing, and overseeing various testing activities to ensure the quality and reliability of software applications.

Requirements

Test Planning: Develop comprehensive test plans and test schedules based on project requirements and deadlines.

Test Design: Collaborate with stakeholders to define test cases and test scripts that cover functional, performance, security, and other testing aspects.

Test Execution: Oversee the execution of test cases and ensure that they are performed accurately, and defects are appropriately documented.

Defect Management: Monitor, track, and report defects using defect tracking tools. Work with development teams to prioritize and resolve issues.

Reporting and Documentation: Create and maintain test documentation, including test plans, test cases, and test summary reports. Communicate test progress and results to project stakeholders.

Nice to have: Proofpoint, Encryption, Phishing

Key points:

Must be eligible for SC Clear (British National)
