Mechanical Design Engineer London (with hybrid working) £65,000 plus annual bonus and generous benefits

Work are proud to have partnered with a global multi-award-winning engineering design consultancy to support in their search for a Mechanical Design Engineer. The business is highly regarded internationally for their technical excellence, high standards of quality and innovation, and their ability to deliver environmentally conscious, sustainable designs for challenging projects across a diverse array of sectors and project types. As an industry leader and innovator, the business encourages and supports the professional development and progression of their staff and invests in research and development to continually stay at the forefront of the industry.

Role As a Mechanical Design Engineer within the London office, you will be responsible for delivering mechanical and multi-disciplinary building services projects from design through to construction for medium to large scale, complex schemes across an array of industry sectors including Commercial, Residential, Hotels, Hospitality, Mixed-Use Developments, Mission Critical and Data Centres.

Responsibilities

- Act as the senior mechanical design engineer and project leader for multi-disciplinary engineering project teams.
- Coordinate mechanical services designs with other building services disciplines and external teams including architects and structural engineers.
- Management of mechanical building services engineering consultancy and design for large scale projects up to RIBA Stage 4A.
- Produce engineering concept design through to detailed design.
- Ensure all design projects and reports are technically compliant and to a consistently high standard.
- Supervise, coach, and develop junior staff members to optimise their potential.
- Use initiative and good judgement to work independently to meet

objectives. • Implement and manage quality assurance (QA) systems and procedures on all projects. • Ensure all designs adhere to Company Health & Safety standards and CDM regulations. Requirements • A recognised mechanical or building services engineering qualification to degree level. • A minimum of 5 years' experience in designing and managing mechanical building services engineering design projects. • Chartered Engineer (CIBSE or IMechE preferred) within chosen discipline preferred, or ongoing pursuit of CEng status and business qualifications. • Familiarity with RIBA design stages, from Stage 1 through to tender design. • Strong technical understanding of various electrical systems. • Ability to communicate effectively with staff at all levels across multiple disciplines Reward • Basic salary of up to £65,000 • Annual bonus and company share scheme • Hybrid and flexible working arrangements • Generous holiday allowance with option to purchase more • Health insurance and employee assistance programme • Subsidised gym or fitness memberships • Supported and financed professional development • Career progression opportunities within an international business If you feel that your skills and experience are suitable for the position of Senior Mechanical Design Engineer, or would like to be considered for similar opportunities, please APPLY NOW! Applications encouraged from professionals with experience in the position of Mechanical Design Engineer, Mechanical Project Engineer, Senior Mechanical Design Engineer, Principal Mechanical Design Engineer and Associate Mechanical Design Engineer.
