Company: Kintec Global Recruitment

Location: Ludgate Hill

Category: computer-and-mathematical

We are looking a Senior/ Lead Mechanical Engineer based in Chesire to work for our client on a permanent basis.

This role comes with a fantastic salary and huge benefits.

Primary Accountabilities;

To manage the Mechanical Engineering support to optimise plant availability, performance, equipment reliability and cost. This role takes an active lead on all issues on the PU and distributes the work within the team accordingly.

To provide short term (Day-to-Day) and long term Mechanical Engineering support to optimise plant availability, performance, equipment reliability and cost.

To ensure mechanical asset integrity is maintained and meets the requirements of health, safety and environmental regulations as required for a top tier COMAH site. This includes all aspects of static and rotating mechanical equipment.

To ensure compliance with the company, site, national and international standards with respect to equipment maintenance and to maintain the overall condition of the asset base and its operation

The Senior mechanical engineer is responsible for supporting and developing the PU Mechanical Assurance Engineer, AO (offsite resource) engineer and Graduate engineer.

Technical Accountabilities;

To provide design and mechanical development for management of change documents and processes and act as the Production Unit nominated signatory and counter signatory for the PU Mechanical Assurance Engineer, graduate, and AO engineer.

To manage and authorise operational risk assessments and inspection deferrals on the production unit on behalf of the PU manager.

To support the planning, preparation and execution of major and minor site turnarounds including scope definition and optimisation. This role has the specific responsibility to ensure that the outcomes of scope optimisation (eg deferral of scheduled events) have been addressed in advance of the Turnaround Event

To provide engineering assurance for the Production Unit with regards to the management of statutory and non-statutory inspection events and general maintenance in line with the applicable Business Process.

Responsible for the development of the CAPEX plan for the asset and tracking the responsible party for each item

Analyse performance and support the Production Unit Bad Actor and MTA process for mechanical assets

Conducting Root Cause Analysis, incident investigations and Reliability Centred Maintenance reviews

Responsible for the PU records management and MOC KPI's with the other PU disciplines

Provide out of normal working hours support where necessary.
