

Merchandising Analyst (Lisburn, NI)

[Apply Now](#)

Company: Sysco Ireland

Location: United Kingdom

Category: computer-and-mathematical

Summary:

At Sysco Ireland, Data is at the heart of every business decision or key project being executed. In the Merchandising Analyst role, you will be crucial to this and be responsible for analysing a wide range of data that helps formulate informed procurement, brand and business strategies. The role will sit within the Merchandising function in Sysco Ireland working closely with Category, Trading, Data & FSQA teams, supporting on a wide range of projects. The successful candidate will be responsible for using analytical tools to provide data driven insights to the business to facilitate effective decision making.

Key Accountabilities:

Design & Maintenance of the Merchandising Dashboard which tracks all core departmental KPI's to drive success.

Generation of weekly & monthly reports to analysis Product Availability, Vendor Service Level & Sales performance across a number of initiatives.

Ongoing tracking and reporting on performance of Sysco Brand products across product lifecycle process. Undertaking of Brand analysis to identify potential opportunities which leverages scale and resources across Europe.

Collaboration with our Business Technology & Intelligence teams to maximise efficiency of reports through automation.

Analyse wide variety of business data across a variety of systems to understand trends with a focus on improving customer experience and supporting growth plans

Incorporation of data analysis to identify potential business opportunities, process gaps and gaps within category ranges to support New Product Development.

Co-ordination of merchandising team activity on key projects to deliver best use of resource, drive continuous improvement while also providing support and training on reports where necessary.

Support in development and implementation of merchandising solutions, support standardization of processes with the end goal of accelerating Merchandising key Initiatives.

Work closely with Sysco International Data team to support harmonisation of data across Europe, participating in and leading on key projects.

Lead on internal data validation exercises to maintain accuracy of Ireland data and ensure data integrity across key data fields on our ERP system.

Support on any data collection activities to ensure effective capture, maintenance and manipulation of data.

Engagement in cross functional projects working with other departments to improve and streamline processes to drive efficiency across the business.

Experience & Qualifications:

Degree in quantitative field (preferred but not essential)

Excellent PC skills and systems knowledge particularly Microsoft Excel (MS Office essential, Microsoft Dynamics AX preferred)

Goal orientated with strong numerical and analytical skills

Strong interpersonal and communication skills

Ability to organise and work to tight deadlines

Flexible, innovative and creative in attitudes to all issues and areas of the business

Excellent team player

Flexibility to travel between Sysco sites

Driving License and access to own transport

Sysco are an Equal Opportunity Employer
