

Mobile Platform RF Engineer

[Apply Now](#)

Company: Integrity

Location: Milton, Cambridgeshire

Category: other-general

Mobile Platform RF Engineer:

- * At least 5 years proven industry experience in an equivalent role
- * Proven ability to take a system view of Mobile RF solutions.
- * Strong background in RF design at PCB board level.
- * Experience with GSM/LTE mobile platforms and reference designs (e.g. Qualcomm or MediaTek)
- * Proven hands-on experience designing and bringing-up mobile RF platforms from the ground up.
- * Experience defining, implementing, and supervising PCB layout design rules and constraints
- * Experience with RF simulation tools (e.g. ADS, MWO, etc.)
- * Experience with digital baseband RF integration

This is a unique opportunity for a highly experienced RF Specialist to be involved in exciting

future product designs, evaluating architectural and system level impacts of new product designs from a mobile RF platform perspective. You will work closely with System, Digital Baseband, and Software Engineers in a co-development environment to create advanced prototypes . As Mobile Platform RF Engineer you will work for an established and well esteemed organization committed to your career and who provide a family flexible environment. Don't miss out on this exciting opportunity. Apply now!

Role: Mobile Platform RF Engineer

Location: Cambridge

Salary: £70-90K plus private healthcare, annual bonus, family flexible organization, pension, dental plan, life assurance, free parking and an early finish on Fridays!

Candidates searching for the following job titles are also likely to be interested in this role:

* RF Specialist * Principal RF Engineer * RF Manager * Chief RF Engineer
