

Multiskilled Maintenance Engineer

[Apply Now](#)

Company: Futures

Location: Farsley

Category: other-general

Are you a Multiskilled maintenance engineer who has experience with both planned and reactive maintenance work. If so, we are working with one of West Yorkshires most reputable manufacturing businesses. As the successful multiskilled maintenance engineer you will have experience on a range of machinery and ideally CNC machines.

Key responsibilities of a Multi Skilled Maintenance Engineer.

Daily plant inspections, monitoring plant performance

You will need to facilitate a speedy response to all plant stoppages and plan/implement modifications to new and existing equipment.

Continuous Improvement - identify new methods and procedures

Carrying out fault finding diagnosis/repairs on equipment and plant

You will have to ensure the PPM schedules are maintained in accordance with the current requirements.

Successful Multi Skilled Maintenance Engineers (Electrical Bias) will be;

Previous experience of working within a manufacturing environment

Time served apprenticeship in an engineering discipline, holding an Electrical Engineering HND / HNC / BTech / ONC / C&G Level 3 qualifications or higher.

Excellent communication skills

Working well under pressure

On offer is a competitive salary, overtime and the change to work for a growing business.
