## Programme

Commercial, claims and risks

Project reporting and development of processes and procedures

As Inter-Array Package Manager your primary responsibilities will be;

HSSE performance through design and implementation to eliminate or reduce risks during construction, operation and maintenance,

Review and implementation of FEED contracts, support main asset procurement and detail design.

Define, develop and successfully manage the interfaces with the rest of project packages,

Undertake tender document preparation, bid reviews and evaluations, contract negotiation and complete contract execution, including claim management up to hand over to the operation team of the inter-array cable related contracts,

Develop the day-to-day interaction with the Contractor to ensure adherence with the HSSE, quality, scope, budget, technical requirements and time schedule,

Manage technical and commercial risks, issues and impacts of changes to the project,

Report to the Senior Project Manager on progress, issues and changes

Coordinate a multidisciplinary team to deliver the works under your responsibilities

### **Contexte et environnement**

TotalEnergies targets 100 GW of renewable generation capacity in 2030 and will continue to expand its business to become a leading international player in renewable energies. Offshore Wind development is one of the axes of this ambition. Offshore Wind projects are specific by their considerable unit size (classically 500 MW to 2000 MW, 1 to 5 bn USD) and their complexity (multiple partnerships, offshore environment, strong competition, etc.)

Currently, TotalEnergies Renewables UK is already a shareholder of Seagreen (1140 + 500 MW, 51% with SSE), Blue Gem Wind (100 MW, 80% with SBE), ODOV (1500 MW, 50% with Corio) and West of Orkney (WOW 2 GW with Corio and RIDG)
