## Penetration Tester

[Apply Now](#)

Company: Strativ Group

Location: England

Category: other-general

ROLE: Penetration Tester  
TYPE: Full-time/ permanent  
LOCATION: England (ideally around W.Midlands)  
Join our Security team as we expand our Cyber testing division, focusing on fortifying critical infrastructure. As a Penetration Tester, you'll lead efforts to detect and exploit vulnerabilities in enterprise systems, ensuring robust security measures.  
Responsibilities: Conduct comprehensive penetration testing and vulnerability research on proprietary software and hardware. Evaluate and mitigate vulnerabilities within systems and applications, using manual and automated testing. Stay updated on cybersecurity threats and trends. Produce clear penetration testing reports with actionable recommendations. Collaborate with IT and development teams to implement security measures. Ensure compliance with industry regulations and organisational security policies. Analyse network configurations to address potential vulnerabilities.  
Requirements: Over 4 years of penetration testing experience. Proficiency in operating systems and networks like Linux, Windows, and Active Directory. Strong programming skills in Python, JavaScript, or C++. Extensive experience in mobile app, web app, and infrastructure penetration testing. Familiarity with cloud assessment, phishing attacks, and breach simulations. In-depth knowledge of web application security and security tools. Excellent communication and report-writing skills. Relevant certifications like CPTS, CompTIA PenTest+, CREST, or OSCP. SC clearance or ability to obtain it. Attention to detail and commitment to quality work. Strong presentation skills. Willingness to collaborate and share knowledge. Understanding of security standards like CIS controls and NIST CSF. Experience in IT and OT/ICS/CNI cybersecurity environments. If you're ready to play a

crucial role in securing critical infrastructure, join our dynamic team dedicated to excellence.
