TM1 Planning Analytics Preston - Hybrid working, 2 days per week in office My client, a market leader in the defense industry, are looking to recruit a Planning Analytics Developer to take responsibility for the timely and accurate delivery of analytics that support senior stakeholders' decision-making. You will have a technical knowledge of TM1 Planning Analytics' architecture, including PAX/PAfE, PAW, and PASS together with the ability to understand technical instructions and communicate these onto others. What you'll be doing: Designing, developing, and maintaining planning analytics models, cubes, dimensions, rules, and reports within an iterative development environment Developing solutions to integrate between IBM Cognos Analytics, Planning Analytics with Watson (PAW) dashboards and IBM Planning Analytics reports (PASS) Working with stakeholders, analysts and other developers to understand systems and collaborate on the implementation of appropriate Planning Analytics solutions Translating business requirements and rules in into technical design specifications Building and deploying Planning Analytics solutions using appropriate code standards, configuration and change management process and procedures Ensuring test plans, unit tests and peer reviews are carried out for all development This is a fantastic opportunity to work in a large, stable employer that has undergone unprecedented growth in the last couple of years. This is a business that works hard to retain its employees - training, development and career progression opportunities are in abundance. For more information, please apply ASAP!
