Position: Heating and Plumbing Engineer

Reports to: Contracts Manager

Location: Westbury

### The Company

Established in 1982 and with 40 years of experience, this company has built an unrivalled reputation for delivering a professional, reliable and friendly service to property owners and large commercial clients across Wiltshire and the surrounding counties.

Working within many different sectors we provide a full range of design, installation and maintenance services for electrical, heating, plumbing, fire and security systems.

### The Opportunity

To be able to carry out installation work in all types of domestic and commercial environments.

### Key Responsibilities:

- Interpret drawings and building specifications to enable the installation of pipework drainage systems
- Installation of supports for pipework, plant and equipment
- Use saws, pipe jointing tools, pipe cutters and other hand tools as necessary
- Installation of heating and water plant both commercial and domestic
- Assess labour requirements on own projects and work with the contracts management team to ensure site progress is managed and maintained
- Prepare materials lists and schedules to enable the correct materials are on site to enable the progress of works to programme
- Record dayworks and variations undertaken onsite and ensure the information is passed to the relevant contracts manager in a timely manner

Annual salary up to £37,000 plus Vehicle, pension, mobile phone, call out and standby allowance and more.

### KEY REQUIREMENTS

- NVQ Level 2 or 3 in Plumbing

- Numerically proficient with excellent attention to detail
- Friendly and approachable with a flexible attitude, good customer focus and service
- Gas qualifications desirable but not essential
