Power Platform Developer

Career Level: 09 Developing Posting Date: 5 Apr 2024

Power Platform Developer

Type: Perm

Hours: Full Time

Location: London/Bristol (Hybrid or Remote)

Are you eager to join a vibrant, fast-paced, and mentally stimulating environment? At ClearCourse, you will have the opportunity to further your skills and career as a Power Platform Developer. Join our passionate team and work alongside talented professionals who will support your development.

About ClearCourse

Join a rapidly growing collaborative of disruptive technology companies working together to build a great software and payments business, with exceptional people and the best products and services.

Across our portfolio of software platforms, we're creating an environment where talented entrepreneurs and businesses flourish. Our team is over 900 people strong and supports over 20,000 customers across the globe.

We have 40 brands located across the UK and internationally, with two primary UK ClearCourse hubs, in which multiple brands are located in London and Preston. These market-leading software businesses form our five verticals; with our integrated payments platform, ClearAccept intrinsic to the entire organisation.

Working better together is central to everything we do, each time we add a new business we're adding new ideas and innovation.

Our mission is to help our customers build great businesses with our industry-specific software and embedded payments solutions.

Job Overview

The Power Platform Developer role is responsible for the delivery of all assigned user stories from estimation through code, bug fixing and documentation while achieving Target Velocity for the Sprint and or another measure of throughput as per the project methodology.

The Power Platform Developer works within a delivery team, typically including a mix of Developers, Solution Architects, QA Engineers, Business Analysts, Functional Consultants and Scrum Masters (client-facing Project Manager). The role is responsible for creating and estimating tasks, and writing quality code to the agreed standards defined Principal Solution Architecture team.

This role has a strong delivery component and is responsible for the delivery of software in agile Sprints. The Power Platform Developer should take ownership of their User Stories as well as perform code reviews for others, taking care to think about performance, security and maintainability.

Your responsibilities will include, but not be limited to:

Contribute to the development of project plans, timelines, and estimates

Work with the solution architect and Senior Power Platform developers to ensure that Power Platform solutions using Microsoft Power Platform, including PowerApps, Power Automate and Dynamics 365 CE function properly and meet the client's requirements

Estimate User Story in Story Points

Task planning breakdown of User Stories and estimation in hours

Develop and implement solutions using the Microsoft Power Platform, including PowerApps, Power Automate, Dynamics 365 CE

Write clean, efficient, secure and well-documented code with unit tests

Utilize Azure services such as Azure functions, Logic Apps, and Azure DevOps for solution integration, deployment, and automation

Troubleshoot and debug issues as they arise

Identify and mitigate risks associated with the solutions

Stay up-to-date with the latest developments in the Power Platform and Azure, and identify opportunities for new solutions

Participate in code reviews and ensure that all solutions are developed to a high standard

Communicate effectively with customers, stakeholders, and team members to understand and deliver on requirements

Maintain automated builds, deployments and scaling strategies

Work closely with project managers and other teams to ensure solutions are delivered on time and within budget

Ensure sprints achieve target velocity and tasks are delivered within the estimated time

Desirable attributes and experience:

3+ years of experience in software development

Strong knowledge of the Microsoft Power Platform, including PowerApps, Power Automate

Experience with Dynamics 365 CE

Experience in integrating with Email Marketing solutions is beneficial

Experience with CI/CD for Power Platform and Azure Services is beneficial

Strong understanding of web technologies and experience with HTML, CSS, and JavaScript frameworks

Good experience with C#, .NET

Good understanding of Azure services such as Azure functions, Logic Apps, and Azure DevOps

ClearCourse Employee Benefits

Life Assurance and private medical cover with cash plan

Group Income Protection and enhanced Company Pension

Enhanced maternity, paternity and adoption pay

Generous training budgets and reimbursement for professional memberships

Hybrid-working model with 25 days annual leave

24/7 employee assistance programme including Peppy Health App

Bike to Work Scheme

Generous Recruitment referral scheme

Additional flexible benefits with the Perkbox platform, providing discounts and freebies from major retailers
