Pre-Sales EUC Architect

Apply Now

Company: CGI

Location: United Kingdom

Category: computer-and-mathematical

Position Description:

Challenge yourself and change lives, unlocking complex system solutions as part of a highly motivated and supportive team. Our Pre-Sales EUC Architects are trusted to work closely with a wide range of clients on exciting projects with real-world purpose and impact.

The Pre-Sales EUC Architects role bridges the gap between the Solution Architect, development team, business team and project management. You will define, validate and promote the right technical solution for a bid, a deal or a project.

CGI was recognised in the Sunday Times Best Places to Work List and has been named one of the 'World's Best Employers' by Forbes magazine. We offer a competitive salary, excellent pension, private healthcare, plus a share scheme (3.5% + 3.5% matching) which makes you a member not just an employee.
We are committed to inclusivity, building a genuinely diverse community of tech talent and inspiring everyone to pursue careers in our sector, including our Armed Forces, and are proud to hold a Gold Award in recognition of our support of the Armed Forces Corporate Covenant.

Join us and you'll be part of an open, friendly community of experts. We'll train and support you in taking your career wherever you want it to go. We are happy to discuss remote or hybrid working but please note you must be eligible for SC clearance and this means you

must have been living in the UK for a min. of 5 years.

Your future duties and responsibilities:

Specifically the EUC Infrastructure Architect is able to build logical models of infrastructure components and interfaces, to contribute to the development of service architecture in specific business or functional areas. These models will reflect the architecture views and can be mapped to the solution architecture. The EUC Infrastructure Architect produces detailed component specifications and translates these into detailed designs for implementation using selected products.

The EUC Infrastructure Architect defines, validates and promotes the solution for a bid, a deal or a project (in a project scope / a dedicated scope within a programme) within our team and to the customer.

The EUC Infrastructure Architect assists in the preparation of technical plans, change governance and estimation from many sources to support the full project lifecycle.

Key Activities

The role of the EUC Infrastructure Architect is to:

• Act as the focus of an EUC Infrastructure Team developing EUC Infrastructure solutions, contributing general technical knowledge and experience.

• Set and manage stakeholder expectations regarding EUC infrastructure and services.

• Assess current and emergent technology, giving advice on price and performance.

• Develop relationships with EUC infrastructure product vendors.

• Align the technology with the business and customer goals, identifying benefits and risk mitigation approaches associated with the proposed solution.

• Apply appropriate technical standards.

• Ensure EUC infrastructure risks are managed, in particular non-functional requirements, including availability, scalability and performance.

• Support formal and informal technical reviews to assure quality of the EUC infrastructure solution design.

• Own the list of EUC infrastructure concerns, architectural decisions and contributes to the technical risk register.

• Coordinate plans and actions with project managers to make best use of available resources, including specialists such as Service Architects.

• Own collated EUC infrastructure effort estimates and costs from teams, subcontractors and

suppliers for one or more subsystems.

• Support the development of team members by knowledge sharing and mentoring.

Required qualifications to be successful in this role:

Risk and Cost Driven Architecture aware.

TOGAF aware.

Knowledge and experience of common EUC products and services (e.g. Microsoft)

Proven track record in leading the development of a range of EUC solutions, ensuring

consistency with specified requirements agreed with both external/internal customers.

Presentation skills

Desirable
