Machine Operator (Rotating Shift)

Rugby (Central Park)

Rotating Morning / Afternoon Shift

£11.75 + £1.61 shift allowance + OT

Interviewing Friday 12th April 2024

Full Time - Long Term Agency

We are looking for 2 x experienced machine operators who can commit to a rotating morning / afternoon shift within a busy engineering company in Rugby.

This is a standing, active role where you operate a machine that produces light ceramic products used in the aerospace and automotive sector.

You will be setting, loading, operating, unloading, and performing quality checking.

The product is not heavy but it's delicate, valuable and damages easy, so you need to be

careful.

The factory is clean, warm, and dry and there is lots of work to keep you busy with.

If you love engineering or perhaps want to learn more about precision engineering then this is a great opportunity.

To be considered - you need to be local to Rugby, able to work the rotating shift, have worked within a machine operating role before and be dexterous.

If you have worked within precision engineering or have some form of engineering BTEC then that would be perfect.

In return for your hard work - this role offers you:

£11.75 + £1.61 p/hour shift allowance for rotating.

Overtime paid at a nice, enhanced rate.

Weekly pay via SolviT Recruitment LTD.

Excellent facilities.

Lots of support from a great production team.

Job security -this is a very long-term role.

A nice career ladder to climb.**APPLY NOW**

If you feel that this is the perfect role then you need to apply now - just respond back to this advert with your CV clearly showing the skills / experience needed and we will be in touch.

Everyone will receive a reply but please do bear in mind that this is an urgent role.
