Principal Highways Engineer

Southbank, London

Hybrid

Do you have extensive highway design experience? Are you looking to work for a creative and innovative consultancy? Do you want to help lead the technical delivery of Civil/Infrastructure design projects?

I have an exciting opportunity for a Principal Highways Engineer to join my client's team in Central London. As a consultancy, they provide transport planning, highway design, flood risk and drainage input at all stages of the development process; from feasibility, through the planning application process and then to detailed design.

Salary & benefits:

Basic salary up to £68k

25 days annual leave

Company pension
Private healthcare
Very flexible working

As a Principal Highways Engineer, you will be focused on the design of s278 and s38 works. You will be managing the technical delivery of projects in a variety of sectors, as well as, mentoring junior members of the team.

Ideally, you would be chartered, or working towards it. You must have a high level of technical competence, including advanced knowledge of transport software packages such as Junctions 9 (arcady/picady), LinSig, TRICS, TEMPPro/NTEM.

This is a rare and unique opportunity for an ambitious individual to take a big step in their career as a Civil Engineer.
