

Process Chemist

[Apply Now](#)

Company: SRG

Location: Grangemouth

Category: life-physical-and-social-science

SRG are working with a global leader in the chemicals industry to help them find an Process Chemist for a 12 month contract.

This is a fantastic opportunity to work with a renowned name and contribute to key projects and gain experience with a leading name in the chemicals industry.

You would be part of a small group of Chemists working on assigned projects, carrying out synthesis and development work.

The Role:

Plan and carry out chemical development work on new and existing processes in the laboratory to meet targets

Analytical testing as required

Advise manufacturing personnel and carry out laboratory work to assist in the resolution of manufacturing process problems

Determine the best method, in consultation with Senior or Principal Process Chemist, and prepare representative samples of new products or the product from process modifications.

Communicate with other technical functions; analytical, process engineers, formulation, manufacturing and SHE functions to exchange information and results to assist in progressing development work

Write up and share results across all levels of the organisation

Requirements:

A degree in chemistry with one a minimum of one years laboratory experience or a PhD

Knowledge/experience of synthetic and/or process chemistry

Ability to work in multi-functional teams with strong communication skills

Ideally experience in qualitative and quantitative HPLC and GC would be beneficial but not essential

This is a great opportunity for a Chemist looking for a new challenge and where they can contribute on key projects.

Please apply online to find out more!
