

Process Operator

[Apply Now](#)

Company: E3 Recruitment

Location: West Yorkshire

Category: other-general

This Process Operator position is with a globally leading chemical manufacturing company that is willing to invest heavily into the successful candidate to promote career and personal development. This role will be based on a 4 on 4 off shift, working 2 x 12 hour days, 2 x 12 hour nights before 4 days off. This shift falls 7 times before an 18-day break. Taking this opportunity as Process Operator would mean working for a leading global producer of chemicals. This is a key manufacturing company relied on by many industries and this Process Operator role is critical to ongoing operation. Long-term opportunities to advance your career, skillset and education are open. Responsibilities of the Process Operator; Ensure the safe and efficient operation of plant and equipment in support of our manufacturing plan. Operate plant and equipment and observe and monitor chemical reactions as detailed in written standard operating instructions. Working to the highest Safety, Environmental and Quality standards. The business promotes a continuous improvement environment and therefore your input into these initiatives is essential to maintain and improve standards. Engage in a personal and career development programme to aid in progression through the company. To be successful in this position as Process Operator, an established technical background with experience in a production or operations environment on a COMAH site within chemical or pharmaceutical manufacturing would be beneficial. We would also consider candidates with experience built within other manufacturing sectors. Working for this multi-million-pound market leading company as a Process Operator means receiving a comprehensive benefits package alongside salary including double figure pension contribution, private health care and discretionary annual bonus. Please apply directly

for further information regarding this Process Operator role.
