

Product Manager

[Apply Now](#)

Company: CDL Software

Location: United Kingdom

Category: other-general

Are you a Product Manager who is looking to work on core product development within a SaaS environment?

What we do:

CDL is one of the UK's leading software development houses, employing over 600 people at its campus in Stockport. It has a consistent history in the high-volume retail insurance sector. CDL has spearheaded developments in the aggregator, web and telematics space, including connected home, enrichment and self-service solutions. As a result, the company's robust and innovative technologies have enabled its customers to thrive in the highly competitive UK insurance marketplace.

We have built a collaborative and creative culture where we employ agile techniques to deliver our pace-setting applications. We pride ourselves on cultivating an inspiring working environment with our employees at the heart of our company. Department Product Owners Employment Type Permanent - Full Time Location North West UK - Hybrid Workplace type Hybrid This role's hiring manager: Jed Shaw

Key Responsibilities

We are looking for a passionate Product Manager who will act as an ambassador for their products, you'll develop a profound understanding of our customer and end-user needs.

Working within an agile environment, you will inspire the software delivery engineering team

through high-value deliverables, communicating the vision effectively. It will be your responsibility to work with the Lead Product Manager to forge your vision for your products and drive the business goals through the team. CDL expects its Product Managers to be the experts and lead the business in a product led culture to help achieve its lofty goals to expand our UK & global footprints and help our customers win through technology.

Working within the Connected Services area you will work with a highly skilled team of engineers working on CDLs growing API offerings connecting the web front end products to our back office infrastructure, manage the interface with the insurance aggregator platforms and drive new innovative ways to create value for CDL and our clients

We are looking for someone who has strong commercial awareness and experience working with cloud-based solutions in a Software as a Service environment. As a Product Owner Manager, you will build your product roadmap to align to the company strategy. Product Managers at CDL have the autonomy to develop their products and own the commercial success, they manage the products profit & loss and work closely with the commercial teams to deliver the best value for CDL and our customers.

Within the digital core product team we are looking for a candidate that can move our connected services products forward. The successful candidate will be working with our development teams building out our API suite, Apache Camel Middleware amongst other technologies as well as identifying new innovative products that deliver value outcomes for both CDL and our clients.
