Production & Maintenance Manager

Full Time

Corsham SN13 9FU

Nova Systems is a global engineering services and technology solutions company, with strategically located offices in the United Kingdom, Ireland, Norway, Singapore, Australia, and New Zealand. We play a key part in keeping the global community safe. We pride ourselves in being responsive to our customers and are committed to delivering our solutions in a timely way. Small enough to care, big enough to matter, we leverage the benefits of scale for our clients.

What makes Nova Systems truly unique, is our people, its where the best and brightest minds come together to challenge, collaborate, and innovate. At Nova Systems we see things differently. We bring (and take) a different perspective.

Our Vision - Smart People. Solving Complex Challenges. Making our world safe and secure.

The Role- Production and Maintenance Manager

The role has overall responsibility for the production facility in Corsham, the delivery of new parts under **UK CAA Part 21G** regulations, the delivery of parts and component repair and maintenance within the scope of **Part 145** approval, and to ensure the production and supplier performance meet compliance and contractual obligations.

You will be accountable to the General Manager of Aerospace Integration - Ronnie Trasler and have line management responsibilities for people in your department. You will provide

professional, efficient, organised, and flexible support to the Nova Systems International Aerospace and Integration leadership and management team, providing quality and timely support to team members across the business. Accordingly, you play an integral part in achieving longer-term profit and growth for the business.

Essential Skills & Experience

Good technical understanding supported by a relevant technical degree, HNC or equivalent aerospace experience.

Strong and demonstrated understanding of aerospace regulations and practices for aerospace production and maintenance, and aircraft modification.

Good understanding of civil regulations pertaining to aircraft parts and aerospace materials.

Experience in team leadership and people management within either a Part 21G or Part 145 environment.

Strong stakeholder management skills

Ability to present open, honest, and constructive communication with staff and suppliers.

High emotional intelligence, concise verbal and written communication skills and effective questioning/listening skills to both technical and non-technical audiences.

Rigorous attention to detail and procedures.

Ability to demonstrate innovative and ethical thinking in the application of solutions.

Ability to deliver tasks on time and with a high degree of autonomy and accuracy, whilst maintaining momentum under pressure.

Demonstrates a commitment to personal and professional development.

Eligibility to work in the UK with eligibility for security clearance if required.

UK Drivers Licence

Desirable Skills & Experience

Experience working within the aviation environment, specifically in the areas of production, maintenance, and aircraft modifications.

Understanding and experience of working in the military aerospace regulated environment.

Advanced IT literacy and be fully competent with full suite of Microsoft Office tools and industry standard planning tools.

What's in it for you?

Basic Salary + discretionary bonus

Up to 7% contributory pension

£3000 Annual Personal and Professional Development Allowance

£300 towards Professional Membership Subscriptions
