An excellent opportunity has arisen for an experienced Production Unit Manager to work closely with the site Production Manager & Operations Manager at a growing manufacturer. The successful candidate will manage all shift processes, production, and work to health & safety & quality standards. This is a great role for a motivated individual with manufacturing experience to join a progressive business, both working with and developing a growing team.

Role Description

Deputise with the site Production Manager in their absence and supporting the

Manufacturing Manager.

Manage the daily plan provided by the demand team to meet overall production requirements using appropriate resources to each activity.

Check of availability of materials for manufacturing plans

Ensure finished goods are manufactured according to SOP's and all activities comply with Quality & Environmental, Health & Safety Standards such as ISO9001, ISO 13485

Full management of production process across areas such as packaging, freeze drying, and cartridge areas

Keep the training program up to date for all staff

Manage any issues that have arisen in the production area

Coordinate effectively with internal departments on things such as new products, improvement projects

Skills and Qualifications

Experience working in an FMCG manufacturing environment, medical/pharma is highly beneficial

Team and people management experience, including managing performance.

Ability to lead and develop teams, spot training and development opportunities

Management qualifications, desirable

Ability to build relationship with key internal and external stakeholders

Company Information

As a business our client is a true market leader within their industry with a strong presence across the UK. With a secure portfolio of clients these roles provide a stable and secure opportunity in the present economic market.
