

Project Engineer

[Apply Now](#)

Company: Hartmann Young

Location: Northern Ireland

Category: other-general

Hartmann Young is partnered with a major player in the industry going through a period of growth and need some engineers to support it. The post holder will be responsible for the specification, design, development, installation, testing and administration of control systems to the highest industrial and pharmaceutical standard. The focus of the work will be to ensure that automation systems operate efficiently and safely, and in compliance with cGXP regulation.

RESPONSIBILITIES: Provide technical support for new and existing automation systems on site. Apply knowledge of automation systems to manage the specification, design, and implementation of building automation and process control solutions in both Hazardous and Non-Hazardous areas in accordance with GAMP 5 and other recognised industry best practices. Manage the upgrade/patching/modification of existing systems, providing technical input to the assessment of impact from the proposed change, and initiating and following the relevant change management process. Commission automation systems and manage the resolution of deficiencies through to completion. Identify training requirements and provide technical training for operations, engineering, and maintenance staff in the use of new and existing automation systems. Supervise and co-ordinate outside contractors. Liaise with group IS /IT to ensure interfaces between automation systems and IS / IT systems are clearly understood, setup and managed appropriately. Identify new technology that could be used to provide real business benefit to the group. Assist in the development of Engineering Projects automation standards and good engineering practices. Undertake other duties in relation to the position as the Company requires, including working additional hours as requested by the Systems Delivery Manager. Ensure GMP is adhered to in all areas of

work. Understand Company's Health & Safety Policy and follow all company HSE procedures. Report all accidents or any unsafe conditions in the workplace. Ensure training has been received before undertaking specific duties and that all training is recorded in training records. Adhere to all HR policies and procedures, to include all absence policies and procedures. Communicate within your own department to ensure that all relevant information is forwarded to the appropriate personnel on a regular and timely basis. Provide regular updates to your line manager regarding progress on required duties and the status of any projects. Observe and adhere to the company's Equal Opportunities and Dignity at Work policies ensuring that a neutral and harmonious work environment is maintained in which bullying and/or harassment does not occur. Ensure that all job specific responsibilities relating to the overall role objective are carried out in accordance with the requirements outlined within the core competency framework.

ESSENTIAL REQUIREMENT: HND in Engineering discipline Experience in delivering excellent results and projects in the pharmaceutical industry or other manufacturing environment. or Experience of providing support, maintenance, or system administration for existing automation systems. Experience of specification, design, installation, commissioning of automation systems (PLC, SCADA, DCS etc) Proficient in the use of Microsoft Office packages (to include Word and Excel) Proficient in the use of risk management techniques in the identification, assessment, and control of risk Excellent communication skills (both written and oral) Proven ability to manage multiple tasks simultaneously whilst maintaining a high level of accuracy in all work carried out. Proven ability to work effectively on own initiative and effectively contribute within a team environment.

DESIRABLE REQUIREMENT: BEng or BSc in Software Engineering or Automation related subject Qualification in an IT/IS related subject. Chartered engineering status. Experience of specification, design, installation commissioning of Environmental Monitoring Systems or Building Management Systems such as Eurotherm Wonderware, Schneider or Cylon. Experience of Emerson DeltaV- DCS Systems to include new installations or modifications on existing plant. Experience of Field instrumentation (specifying, configuring, troubleshooting, etc), and understanding low voltage electrical designs and drawings Specification and procurement of process control and analytical instrumentation for hazardous and non-hazardous environments Experience of industrial communication protocols e.g. Modbus, BACnet Experience of maintaining / configuration of electronic chart recorder, e.g. Eurotherm Proficient in the use of AutoCAD Ability to configure new I/O points, modify graphics, add device drivers, or develop sequence controls. Working knowledge of

development and review of hardware and software design documentation including I/O lists, FDS, SDS, test documents, etc
