

Project Engineering Manager

[Apply Now](#)

Company: Amentum

Location: United Kingdom

Category: other-general

Amentum is a premier global technical and engineering services partner. We draw from a century-old heritage of operational excellence, mission focus, and successful execution underpinned by a strong culture of safety and ethics.

We are now recruiting for a Project Engineering Manager to join us permanently on our major projects.

As PEM you will be responsible for the management, leadership, coordination, implementation and performance of discipline engineering activities for an assigned project within our major project.

Responsibilities:

As Project Engineering Manager you will:

Have a solid understanding and is able to apply relevant safety legislation, including: Construction Design and Management (CDM); Principal Designer requirements; Provision and Use of Work Equipment Regulations (PUWER); Health and Safety at Work Act

You will review and manage control of design on a project: production of Design Control Plans (DCP); design review management and input; design change control

Produces appropriate engineering deliverables: Bases of design (BoD); analysis; calculations; drawings/diagrams; specifications

Manage and coordinate technical risk management activities: risk management strategy and planning; risk identification and assessment; risk mitigation; risk register

production and maintenance

Coordinate the management of requirements: Understanding of systems engineering principles; requirements identification; configuration control; validation and verification

Manage and coordinate the development of engineering delivery baselines: scope definition; input to project management deliverables (WBS, schedule, estimate etc); project execution plan / engineering execution plan)

Coordinates oversight of project delivery and project reporting: rules of credit; progress monitoring and reporting; recovery planning

Engages with, and oversees delivery partners and supply chain organisations: specification of engineering and technical requirements; technical assessment of tenders; management of TQs and concessions; management of supply chain deliverables.

**Understand and works within / provides input to the project delivery lifecycle
Understands and works with / provides input to nuclear industry standard gated delivery processes**

Responsibilities (nuclear specific engineering):

Experience & knowledge of the UK nuclear site licence conditions and specifically those related to engineering

Knowledge of configuration controlled nuclear baseline throughout the project facility lifecycle

Experience of nuclear site licence company procedures

Knowledge of generic nuclear new-build safety case: stages and key deliverables; design change control; engineering deliverables

Solid and proven knowledge of UK nuclear facility operational safety case: design change control/configuration management; facility modification; periodic review of safety

Knowledge of design substantiation process and interactions with the nuclear safety

case

Experience of quality control and the relationship between nuclear safety and the project lifecycle

Knowledge of the UK nuclear and environmental regulators and their interactions with UK nuclear site licence companies

Position Knowledge, Skills, and Abilities Required:

Ideally Bachelors degree in engineering or science subject or demonstrated equivalent combination of qualifications and experience.

Possess or working towards Professional membership of a relevant chartered body

Proven experience working in a complex/major project engineering delivery environment of which part in a supervisory capacity managing a single-discipline engineering delivery team including management of engineering supply chain organisations

Currently hold SC or prepared to go through the SC process.

Amentum is an equals opportunities employer.
