

Project Manager (offshore survey projects) H/F

[Apply Now](#)

Company: Aventa

Location: United Kingdom

Category: business-and-financial-operations

Role Definition

For one of our client we are currently looking to recruit a Project Manager to support offshore projects in the marine survey industry, in Italy (Naples) or Uk (Norwich)

We are looking for an experienced Project Manager who can take accountability for the whole project lifecycle. Although not essential, you will ideally come from a marine background and have a sound technical understanding of geophysical and geotechnical survey equipment/operations.

Activities include:

- Client relationship management including dispute resolution and achievement of project schedules
- Helping the commercial team define a project scope including equipment and personnel resources
- Ensuring projects are controlled in a timely fashion in terms of on schedule, on budget and within health and safety parameters
- Assisting in the preparation of project procedures, quality control plan and QHSE documents
- Working closely with the Party Chief to ensure plan and monitor project activity
- Participating and contributing to internal and external kick off, close out and lessons learned meetings

Qualification

Required experience in the following areas:

- Construction, pipe lay, site surveys, UXO, cable routes, towed geophysical and ROV

surveys [geotechnical experience is desirable but not essential]

- Responsibility for requesting/raising purchase orders and invoice preparation and approval by the client ensuring timely payment
- Responsibility for the management of external providers and approval of invoices
- Sharing regular updates with the Project Director

The majority of the projects are in the Mediterranean, Baltic, and North Sea.

Conditions

Hybrid work possible - presence in Italy or UK is mandatory on a weekly basis

Others informations

Start date :ASAP

Duration : Lon term assignment

Type of contract:Permanent or Contractor

Seniority level Project Manager, Interface Engineer, Package engineer

Type of project : Offshore Power Cable & optical fiber

Countries Italy, United Kingdom

Location : Italy or UK
