Project Manager - Utilities - Perm - East of England

Your new company

Our client is a leading provider of utility services nationwide. With a strong focus on delivering high-quality projects in the energy sector, our client plays a crucial role in the region's infrastructure development. They are currently seeking an experienced Utilities Project Manager to join their team. This is a fantastic opportunity to manage diverse projects and contribute to the continued growth and success of the organisation.

Your new role

As a Utilities Project Manager, you will be responsible for overseeing and managing a variety of projects nationally. This role offers the flexibility of remote work, with site visits required 1-2 times a week. You will play a pivotal role in ensuring projects are delivered on time, within budget, and to the highest quality standards. This position offers a stimulating and varied experience, working on projects involving civils, mechanical, and electrical works within the energy sector.

Responsibilities:

Manage and lead utility projects, from initial planning and design stages through to project completion.

Develop project plans, including timelines, budgets, and resource allocation.

Coordinate and collaborate with contractors, subcontractors, suppliers, and other stakeholders to ensure project objectives are met.

Conduct regular site visits to monitor project progress, track key milestones, and ensure adherence to schedules.

Maintain effective communication with clients, providing regular updates on project status, risks, and opportunities.

Implement and enforce health and safety regulations on-site, ensuring compliance with industry standards.

Oversee quality control procedures, ensuring compliance with project specifications and regulatory requirements.

Manage project budgets, monitor costs, and implement cost control measures.

Identify and manage project risks, implementing appropriate mitigation strategies.

Resolve any issues or conflicts that arise during project execution, facilitating effective problem-solving.

Ensure all project documentation is accurately maintained and archived.

What you'll need to succeed

Previous experience in Civil, Mechanical, or Electrical projects is essential.

HNC or degree in a relevant field within the industry (e.g., Civil Engineering, Mechanical Engineering, Electrical Engineering or Project Management) is required.

Proven experience in a similar project management role, demonstrating the ability to successfully deliver projects on time and within budget.

A valid driving licence is essential for this role.

Strong knowledge of project management principles, methodologies, and best practices.

Excellent organisational and time management skills, with the ability to prioritise tasks and meet deadlines.

Strong communication and interpersonal skills, with the ability to build and maintain relationships with clients, contractors, and project teams.

Sound understanding of health and safety regulations and building codes.

Proficiency in project management software and tools.

What you'll get in return

Exciting opportunity to manage a variety of utilities projects nationally.

Remote work flexibility, with site visits required 1-2 times a week.

Competitive salary package with additional benefits.

Permanent role with a reputable and established company.

Opportunity to contribute to the growth and success of the organisation.

Collaborative and inclusive work environment.
