Project Manager

Are you looking for a Project Manager role? Interested in working for a leading Civil Engineering and Building company delivering high quality projects?

VANRATH are recruiting a Project Manager to work on Water Infrastructure projects, based in Northern Ireland with occasional visits to ROI.

Remuneration:

£Competitive DOE + excellent package

Client

Our client is a leading Civil Engineering and Building company delivering high quality construction and civil engineering projects across the UK and Ireland. Innovation, quality,

integrity and professionalism are the cornerstones of the business which is renowned for its personal, hands on style.

Due to their continued growth and development framework, an exciting opportunity has arisen for a Project Manager to join them on a permanent basis. The Project Manager will play a key role managing Early Contractor Involvement projects within water and wastewater infrastructure sector.

Responsibilities include programme management, subcontractor and consultant management as well as client engagement. There will be the opportunity to continue to develop professionally with the support of the Framework Manager.

Role & Responsibilities:

Ensure adherence to the health, safety and environmental policies and ensure safe systems of work are planned and implemented on assigned projects

Ensure adherence to the Company's quality procedures including production of the project quality plan and completion of the necessary project documentation

Attend sub-contractor and client meetings as required, ensuring a positive working relationship is established and maintained, always acting as an ambassador for the Company

Ensure detailed project programmes are drawn up and adhered to on all assigned projects and to regularly report progress against these

Provide technical input into the design process to minimise and mitigate against risks during the construction stage

To take responsibility for the successful completion of assigned projects

Take the lead in design & buildability reviews on your assigned projects

Assist the cost management team in developing construction costs for your assigned projects

The Ideal Person:

Degree qualified or other relevant qualifications

Experience within the water / utilities sector

Ability to lead a programme and deliver to a high standard

Track record managing multiple projects

Experience of managing all HSEQ aspects involved in the construction process

Strong working knowledge of MS Project and CAD

Understanding and commercial application of contracts including NEC3 / NEC4

Previous experience of managing ECI Projects is advantageous

Able to use initiative, taking accountability and responsibility for a project from start to finish

Deadline driven, instilling motivation in the team and supply chain to hit key targets

Excellent communication skills and good general commercial awareness
