Protection & Control Engineer

Power Networks, Transmission & Distribution

Stafford

£47,000 to £74,000 plus car plus benefits

Job Ref: J(phone number removed)E

Due to recent wins, we are recruiting in across the UK for numerous Protection & Control Engineers.

You will be accountable for the following tasks including but not limited to:

* Carrying out detail design works including the protection and control aspects of different projects

- The work includes
- SLD,
- KLD,
- schematics,
- wiring diagrams
- functional specifications,
- setting reports,
- coordination and discrimination studies,

- telecom,
- network architecture,
- SCS,
- cable sizing and voltage drop,
- LVAC and LVDC load calculations and sizing,
- technical specification for P&C equipment,
- battery and UPS systems.

* Carry out CDAE for P&C discipline

* Carry out P&C Design Assurance activities

* Ability to attend and chair the design review and Hazard review meetings and reviewing P&C design packages as required.

* Attending site visits, FAT and SAT as required.

You'll need to have:

* HND or Degree qualified in Electrical Engineering or equivalent qualifications and experience.

* Proven extensive experience in P&C design of substations in UK

* Good knowledge of electrical codes and standards

- Full UK Driving Licence.

To apply speak to Cindy Anderson

You could be an Electrical Design Engineer, a Plant Engineer, a HV Design Engineer, a P&C Engineer, and M&E Engineer
