Company: Penguin Recruitment

Location: St Albans

Category: architecture-and-engineering

Public Health Design Engineer

Ref:BM175

This is the exciting opportunity for an experienced Public Health Design Engineer to join an award-winning multidisciplinary firm in their offices in St Albans. The successful candidate will report straight to the Director and work on various projects across the leisure, residential, and commercial sectors.

The successful candidate will be responsible for:

Produce domestic water design and demand calculations in line with BS and IOP standards

Work on domestic water and drainage pump capacity sizing, as well as fire sprinkler and above ground foul and rainwater design

Produce design and specifications for renewable technologies, whilst also carrying out site inspections.

Produce high quality concept designs from RIBA Stage 2 and carry them out till completion for RIBA Stage 5. The ideal candidate will have:

Relevant degree within a mechanical or building services engineering field

Strong experience as a Public Health designer at a consulting engineering firm

Experience with Software's such as Revit, as well as Fire hydrant design and Dry and wet risers.

Good knowledge of building regulations such as Part G and L, as well as British Standards.

Has a full UK driving license and lives within a commutable distance of their St Albans offices

Competitive salary

Private medical aid

Company pension

Generous holiday allowance

Mobile Phone allowance

This role interests you or if you are interested in searching for other roles relating to sustainability please feel free to contact Ben Moore on (phone number removed) or email (url removed). There are many more roles available on our website at (url removed). This is a permanent role.
