

Regional Environmental & Sustainability Specialist

Apply Now

Company: DP World Australia

Location: United Kingdom

Category: other-general

The **Environmental & Sustainability Specialist** will be part of the specialist QESH team in the region who will also be connected to the **DP World** Environmental team. In this role you will be part of the team responsible for the development and administration of environmental management programs to reduce the environmental impact; coordinates activities to improve environmental performance in the areas of design and construction practices and environmental activities. You recommend and assist in the facilitation and implementation of changes and improvements. You are the Specialist who will ensure environmental requirements, climate data, governance and reporting is completed both to satisfy government requirements, customer requirements and DP World requirements, and to provide the foundation for key decision making in the region. This role can be based from any of the European countries where we have an existing DP World location. Please be aware that this role will include international travel (50%) and that you should be flexible to be away from home for a period of time.

Key Accountabilites:

Development and maintenance of the environmental and management systems and procedures, ensuring that legal, customer, standard and company requirements are encompassed in the design.

Supporting with the data collection, calculation, analysis and presentation of our Greenhouse Gas (GHG) Inventory (Scope 1,2 and 3) in cooperation with Group HSE.

Work with the region to secure higher data quality in particular for Scope 3 data.

Support digitalization of our carbon footprint. Secure customer requirements for annual reporting of qualitative and quantitative environmental data to a high standard – eg: CDP, NQC.

Liase with procurement on annual renewable electricity requirements for customers.

Contribute carbon expertise to ongoing projects, such as tracking progress towards DP world carbon neutrality goals.

Empower the QEHS regional teams by creating an environment that promotes positive communication, encourages collaboration and demonstrates flexibility.

Participation and administration of Integrated Management Systems audits for ISO 14001 and ISO 50001.

Design and develop best practice environmental procedures, ensuring these procedures are understood and implemented regionally.

Develop and maintain environmental emergency preparedness and response processes.

Provide specialist guidance for Environmental induction for all employees.

Working with the operational teams to improve the environmental performance, reducing the impacts to the environment from operational activities.

Conducting internal environmental audits, work place inspections and environmental tours to the prescribed frequency.

Responsible for environmental legal compliance audits- activities including record keeping and follow up.

Responsible for maintaining a corporate register for environmental legal compliance in the region and communication of changes to environmental laws across the region.

Environmental incident / accident investigation coordination including record keeping of conclusions, actions & follow up.

Chairing environmental meetings, presenting data, recording actions and maintaining the progress on the actions.

Monitor & report country and site environmental performance to local and country management

and external interested parties eg: CDP.

And also:

Be responsible for the carbon collection processes and carbon neutrality programmes in the region.

Oversee the regional ISO 14001 and 50001 processes and ensure that both customer and DP world environmental reporting is completed in a timely manner – eg: CDP, NQC, Customer specific GHG emissions reports.

Key Requirements:

University degree in environmental or engineering field or similar.

Validated experience in data and reporting within sustainability, preferably in corporate environment.

Languages - You speak and write fluent English – additional languages are a bonus, in particular German.

Have a minimum of 3 years' experience in Environmental Management or specialist roles.

Very strong carbon account competencies, in particular Scope 3 accounting.

Demonstrable skills in data handling in Excel.

Ability to understand data granularity whilst also understanding high-level perspective.

Experience in the logistics industry.

Highly preferred:

ISO 50001 implementation experience.

ISO 14001 implementation experience.

Carbon Accounting experience.
