Remote Senior DevOps Engineer - The Platform Team

Apply Now

Company: SoftwareOne

Location: United Kingdom

Category: other-general

Why SoftwareOne?The SoftwareOne Marketplace Platform Team is seeking a Senior DevOps Engineer who enjoys working with the latest technologies and practices and are inspired to learn new things in new ways. You will be helping us drive our infrastructure automation projects as part of an engineering team that prides itself on understanding the business that we support and evolve. Our approach to platform engineering aims to build SoftwareOne's online marketplace, client interfaces, internal integrations and external vendor relations to a world class standard. Our philosophies include establishing a blame-free environment focused on continuous improvement. We strive to live a feedback culture that keeps an open mind to new ideas and productively challenges the ones we do not understand.The roleRole is 100% REMOTE from the following countries: UK, Ireland, Spain, Italy, Belgium, Bulgaria, RomaniaWhat you will be doing:Beyond committing code, you will be expected to help define, document, and drive new initiatives and best practices. You will act as a senior resource for your junior colleagues in the form of patiently answering their questions, mentoring, pairing, and sharing knowledge through documentation and presentations. You will be called on to represent the team's interests within the greater engineer organisation.What We Need To See From YouYour skills and experience:Cloud automation is of outmost importance. Azure is preferred, though we will not overlook a very strong candidate with significant AWS experienceCI/CD pipeline developmentIaC, specifically Terraform or a wrapperKubernetes, or a Cloud-managed container orchestrator, e.g. AKS, EKSExperience operating an observability stack preferredBonus points for being security-mindedAbout You:You have experience operating a mature, high volume stack in

the cloudYou have opinions on what a fully-realised platform should look like, and you have defined and implemented large portions of thatYou are a proponent of adhering to best practices, but are pragmatic enough to know when flexibility is called forYou are a skilled communicator, able to interface with and tailor your message to counterparts in engineering, as well as colleagues in other functions, of all technical levelsJob FunctionMarketplace Platform
