

Renewables Engineer - Air Source Heat Pump Manufacturer £55k

[Apply Now](#)

Company: Jamieson Clark

Location: Slough

Category: architecture-and-engineering

Immediate telephone interviews available subject to qualification for the role

Company - Long established, major market leading Heating Manufacturer of air source heat pumps, invests in workforce, long term serving and high performing national team with a large install and service team.

Location - Slough and surrounding counties

Industry - Air Source Heat Pumps, ASHP's, Ground Source Heat Pumps, GSHP's, Renewables, Domestic Heating,

Benefits - £55k, flexible overtime if desired, 37 hours a week, NO weekend rota, new van and tools.

Candidate - Experienced domestic plumbing and heating engineer, with hands on experience servicing, fault find and fix on ASHP's and with knowledge of heating controls, plumbing and wiring with air source heat pumps. If you have only installed ASHP's then please still apply as FGAS qualification will be given.

The Position

This is a brand-new Renewables Engineer position serving heat pumps, working directly for one of the largest Renewable Heating Manufacturers in the UK, that has been created due to unprecedented growth. As the Renewables Engineer you will be responsible for maintaining an ever increasing amount of air source heat pumps on residential housing projects both new build housing developments through housebuilders and social housing schemes, new build or retro fit, through local authorities and housing associations.

The Package

- * £50k - £55k + flexible overtime if desired (optional)
- * 37 hours a week, NO weekend rota.
- * Company van
- * Healthcare
- * Dental
- * Pension contribution over 10%!
- * Lunch allowance
- * Up to 27 days holiday + bank holidays
- * Industry recognised manufacturer training
- * Genuine potential for career advancement usually within 2 years.

Experience Required

Due to the nature of the role you must have extensive experience in plumbing and heating either install or service of domestic or commercial unvented hot water systems incorporating

boilers AND/OR heat pumps - either Air Source Heat Pumps (ASHP's) or Ground Source Heat Pumps (GSHP's) or other renewable technologies such as solar PV, heat recovery, and underfloor heating. Furthermore, recognised industry training and further education qualifications such as City & Guilds plumbing and heating, BPEC, WREGS, G3 unvented hot water systems, F-gas, boiler training, heat pumps and electrical training are an advantage (please see info below). If you have no ASHP experience but are a highly experienced boiler service technician then please still apply.

The Company

A leading brand name Renewable Heating Manufacturer, synonymous with reliability and quality within the heating and renewables industry. They supply air source heat pumps and ground source heat pumps along with other cutting edge renewable technologies that comply with the latest industry regulations for the domestic residential housing market. Their systems are used on the largest residential new build housing projects nationwide and they are a preferred supplier by the largest and most well known housebuilders, housing developers, local authorities, housing associations and councils.

Applicable Qualifications (not all required as training given)

NVQ Level 2 Plumbing, Heating Ventilation, NVQ Level 3 Plumbing, Heating Ventilation, FGAS, Electrics, WREGS, G3, Heating Controls, Part Y, Part L, 18th Edition, Airconditioning and Heatpumps, Ventilation and Heat Pumps, Installation, commissioning and servicing of Air Source Heat Pumps.
