Reporting Actuary – Nearly to 3 years PQE

[Apply Now](#)

Company: pmactuarial

Location: United Kingdom

Category: computer-and-mathematical

pmactuarial specialise in Actuarial search within UK Life insurance. We have been asked to find a Reporting Actuary to work within a global life insurer.

Based in London (but working from home), the role will be part of a team that is responsible for end-to-end external reporting for an insurance business that is Asian and north American focused.

The role will focus on financial and economic capital reporting, solvency monitoring, analysis of results versus business plan and communicating results to management. The role will offer the opportunity to work on reporting to a range of international metrics (this is not a Solvency II role), exposure to different markets and exposure to different regulation.

The ideal candidate will be a nearly qualified Actuary to qualified Actuaries with up to 3 years PQE. Financial reporting experience is highly desirable, however, full training will be given to those without.
