

Risk Manager / Senior Risk Manager

[Apply Now](#)

Company: TRS Staffing Solutions

Location: United Kingdom

Category: business-and-financial-operations

Roles across UK including London, Birmingham, Bristol, Manchester and Glasgow

Up to £80,000 dependent on experience + excellent benefits

Risk Managers / Senior Risk Managers to work on our national portfolio of complex infrastructure projects with experience of implementing Risk Management on major construction, energy, or infrastructure projects, preferably with a formal professional Risk Management qualification.

Our projects range in value from £20m+ to £20Bn+ with a variety of high-profile clients giving our team a diverse and exciting workload across a range of sectors.

We are looking for candidates with proven experience in a risk delivery role on major projects/programmes.

APM/IRM risk certified candidates preferred with QSRA experience would be ideal.

Responsibilities

Ensure the successful delivery of risk management services in a consistent, professional manner with the aim of exceeding client expectations.

Implement effective risk management activities to actively reduce risk exposure and uncertainty on projects & programmes.

Support development and implementation of risk management approaches/systems for clients, incorporating best practice and procedures.

Facilitate workshops and engage with project teams to ensure the effective implementation of risk management.

Carry out risk analyses using industry recognised software / databases.

Produce risk reports summarising outputs to suit needs of the project / programme.

Support the development of new risk management processes, procedures, and tools as part of continuous improvement and innovation.

Support our win work activities with the preparation of bids and proposals to secure new commissions.

Support with business development, client engagement and other profile-raising activities to promote our risk management services.

Requirements

A recognised diploma or degree or be qualified by experience with a qualification in risk management.

Experience of working on major infrastructure projects in at least one of the following sectors: Transportation, Energy, or Infrastructure.

Demonstrate competency with implementing Risk Management processes aligned with ISO31000/ Institute of Risk Management / Association of Project Management methodologies including but not limited to: Initiating, developing, and implementing risk management processes. Facilitating workshops as part of the overall delivery of the risk process. Conducting risk reviews applying qualitative scoring of risks. Undertaking Quantitative Risk Analysis techniques. Producing appropriate risk management reports to inform decision making. Awareness of industry risk management tools such as: ARM, Xactium, Primavera Risk Analysis, SafranRisk, @Risk, Risk Predict!

An understanding of the Value Management process and how it is applied on projects.

An understanding of how risk management integrates with other Project Management and Project Controls disciplines including cost estimating, project planning and contract administration.
