

## Salesforce Data Architect

[Apply Now](#)

Company: TECHOHANA

Location: United Kingdom

Category: other-general

Role: Salesforce Data Architect Location: Remote - UK & Europe Day Rate: £400 Per Day Outside IR35 Length: 6 months Responsibilities: Collaborate with cross-functional teams to understand business requirements and translate them into technical solutions using Salesforce Data Cloud. Configure and customize Salesforce Data Cloud to meet specific business needs, including data modeling, data cleansing, and data integration. Develop and maintain data pipelines, ETL processes, and data quality rules within Salesforce Data Cloud. Perform data analysis and profiling to identify data inconsistencies, anomalies, and opportunities for improvement. Implement data governance best practices and ensure compliance with data security and privacy regulations. Provide technical expertise and support to troubleshoot issues related to Salesforce Data Cloud configuration and integration. Document technical specifications, data mappings, and data flow diagrams for Salesforce Data Cloud implementations. Stay updated on the latest Salesforce Data Cloud features, enhancements, and best practices to recommend and implement improvements. Qualifications: Bachelor's degree in Computer Science, Information Systems, or related field. Minimum of (X) years of experience working with Salesforce Data Cloud (formerly known as Salesforce DMP) in a technical role. Proficiency in Salesforce platform administration, configuration, and customization. Strong understanding of data management principles, including data modeling, data warehousing, and ETL processes. Experience with Salesforce Data Management Platform (DMP) tools, such as Audience Studio, Krux, or similar platforms. Familiarity with Salesforce integrations, APIs, and data connectors. Excellent analytical, problem-solving, and communication skills. Salesforce certifications (e.g., Salesforce

Certified Administrator, Salesforce Certified Platform App Builder) preferred.
