## Section Engineer

### Civil Engineering Main Contractor

#### Permanent position

#### Tunnelling Project NW Wales.

An opportunity has been created for a Section Engineer to join a live North West Wales based Project for a Main Contractor on a permanent basis.

Working with the National Grid the project aims to construct a new Tunnel, which will house pipelines, communication and powerlines to preserve the natural beauty of the landmark.

The main focus of the role is to Support and assist with the management and coordination of all works within area of responsibility, including management of junior Engineering staff.

Due to the nature of the works its essential that you will be degree qualified with CSCS,

SMSTS and be Lifting Appointed Persons.

**Key Duties:**

Identify all required materials and procure them to support the programme of planned works.

Monitor stock levels of materials within area of responsibility and arrange restocking

Complete material and resource returns, recording actual usage against planned.

Present reports to line management, including recommendations for improvements.

Maintain a working knowledge of all subcontractors' scopes of works within area of responsibility.

Identify and record any changes to scope, including delays.

Provide appropriate records to line management and commercial teams.

an organisation they currently work on a number of projects spanning across Highways, Rail, Tunnelling and Civils across the UK.

Base salary and car/car allowance level will be dependent upon skills/experience up to 50k +  
. Car allowance option would be up to £5k.

To be considered for this opportunity please apply or contact Laura Stephenson on: 07495 896 044.
