

## Senior / Architectural Technician (Contract)

[Apply Now](#)

Company: BakerHicks

Location: United Kingdom

Category: other-general

### Description

Our Architecture team has a great opportunity for a contract Senior/ Architectural Technician to join the business, working on exciting and highly regulated projects in various sectors including Defence, Custodial, and Life Science.

As a Senior/ Architectural Technician, you will have experience in the RIBA stage 4 (Detailed Design) but an overall understanding of stages 0-7 drawing production and have successfully delivered coordinated construction drawing packages using the latest design software.

Working within a multi-disciplinary team, you will be experienced in generating high-quality, accurate, and detailed design packages, while understanding the latest industry-standard software and information management techniques and be able to deliver high-quality outputs on projects.

This hybrid working role will require one day in office with the balance remote.

There may be the occasional need to be onsite.

### Key Deliverables

Be responsible for the production of fully co-ordinated discipline specific 3D models, schematics, general arrangement, and detailed drawings per the relevant standards and procedures

Be responsible for the delivery of discrete packages of work under the supervision of a Senior Architect

On occasion, manage Architectural CAD involvement in small to medium-sized projects, including time, cost, quality, and delivery.

To provide appropriate levels of Architectural design support to a range of different projects.

### **Why this role?**

Opportunity to work on complex large-scale projects in niche sectors

Working at the forefront of 3D design using cutting-edge technology

You will join a great team of professionals who value innovative ideas and challenging the status quo; with the opportunity to plug into our wider network of expert professionals to grow your skills and expertise

Opportunity to see your designs come to life through construction

### **About You**

You will have solid Revit experience

You will have reasonable detailing experience within one of the following sectors – Life Sciences, Custodial, or Defence

Understanding of Technical Specifications – bonus if you can produce these

Proficient with excellent technical detailing ability through both scheme and detailed design project phases within a Revit 3D environment

Experience in architectural model delivery in a design consultancy environment

You will be able to work independently and manage your time

Must be willing and able to obtain SC clearance for the sectors these projects sit

within

### **About BakerHicks**

BakerHicks are a design, engineering and project delivery company specialising in complex infrastructure, process and built environments across the full project life cycle.
