Senior Backend Engineer – Train in Machine Learning – Full Remote

Apply Now

Company: Propel London

Location: United Kingdom

Category: architecture-and-engineering

Job Description

The Role

As a senior backend engineer at this AI scale up you will have the opportunity to work closely with the companies Data Science team to transition into a machine learning engineer role. In your first 3 months in the role you will work closely with the highly successful CTO of this business and head of data science to understand their backend systems and machine learning models. The team work in Golang on the backend and are happy to train any candidates in this technology as long as you have a mastery of another language.

This is a remote first company with team members in San Fran, New York, Berlin and London and you must be open to working remotely going forward.
