Company: GK Recruitment

Location: United Kingdom

Category: computer-and-mathematical

Description

The Overview of the Business Central Consultant

Outlined below are the main duties and responsibilities of this key role within my client's delivery team. This description is not exhaustive and at our discretion, the employee may be asked to undertake duties outside of those noted below. If duties not listed are to become permanent or if the employee is promoted or transferred to another role, then the role description will be amended accordingly or the new appropriate role description issue

Role Description and Purpose

Our ideal candidate would have proven experience within Business Central. Ideally, the candidate will have a Finance background, this is a fundamental skill set that is often overlooked despite it being a Finance system at its core. Understanding of development code, standards, and ultimately the ability to write code would be advantageous. The candidate must be able to lead and/or take part in projects and focus on the implementation and delivery of software applications. This would involve the technical specification of new solutions, implementations, and the maintenance of existing systems. There would be a requirement to provide functional and domain expertise related to the installation, set-up, customisation, analysis, and testing as well as providing training on the product and our suite of ISV and company-specific add-ons.

Role Responsibilities

- Manage software implementations or projects from inception to customer sign-off

- Participate in discovery, design, planning, deployment
- Configure the Business Central application for the customer environment
- Ability to utilise and train Customers on BI tools, such as Jet and Power BI
- Consulting - covering all aspects of pre-sale, analysis and Implementation, and Support
- Assist in improving business processes
- Extensive knowledge and functional understanding of the Business Central product range
- You will be self-motivated and driven to exceed excellent Customer satisfaction
- Good project experience with implementation.
- Migration experience
- Ability to communicate effectively with all levels of a customer's organisation

Core Technical Knowledge

- Minimum 3 years work experience as an implementation consultant
- Experience working with NAV, Business Central, and SQL Server
- Strong experience understanding ERP Processes
- Experience with solution design, documentation, training and analysis
- Well-versed in software testing including Unit testing, UAT testing, and User Story testing
- Experience working in the distribution area (namely logistics and Omni channel sales)
- Experience with integration to other applications
- Knowledge of C/AL, ideally with NAV C/AL coding experience & AL

Location: Home-based, from within the UK
