

Senior Civil and Infrastructure Engineer

[Apply Now](#)

Company: Calibre Search

Location: United Kingdom

Category: architecture-and-engineering

Description

We are currently working with a bright, progressive and highly successful structural and civil design practice based in Farringdon, as they look to add a Senior Civil and Infrastructure Engineer to their team which is growing organically and sustainably.

As a Civil and Infrastructure Engineer, you will be representative of the culture and approach to work communicated by the Directors through the Business Policies and Vision and Values.

The company has signed the IStructE Engineers declaration on the climate and biodiversity emergency and that will assist in strengthening their working practices to create structural and civil engineering outcomes that have a more positive impact on the world around them by adopting the IStructE guidance on our approach to design.

The key purpose of this role is work alongside a team of engineers to deliver innovative solutions in external works, drainage and flooding issues to facilitate new developments, refurbishments and maintain the highway drainage network.

You will be part of a team that works in a professional manner, applying your skills effectively and competently. Their approach is one of working pro-actively and enthusiastically with colleagues both internally and from external organisations. You will adopt an ethic of 'team-working'.

Your core responsibilities will include:

Design of below ground drainage systems, earthworks, external works and other civil engineering structures to appropriate Statutory Requirements and Guidance from relevant Codes of Practice, Technical Notes, etc.

Liaise with all relevant Statutory Authorities and other relevant bodies to obtain approvals as necessary for the Infra-structure works.

Liaison with Client, Project Manager, Architect, local authority and other external agencies throughout the planning stage and produce Drainage Strategy and Flood Risk

Assessment

documents to obtain planning approval.

Preparation of appropriate documents, calculations, specifications and sketches in line with Evolve Procedural Manuals suitable for all stages of the project from concept to Building Control

submission and approval.

Prepare CAD Standards, Specifications, Design Statement Templates for drainage and civil engineering works for the relevant stage of the project.

Liaise with CAD Operators where appropriate to enable them to prepare suitable drawings for the relevant stage of the project.

Work alongside the designated Project Engineer to monitor progress of the design against programme.

Attend meetings where appropriate

Visit site to evaluate constraints on and/or progress of construction and that the constructed works reflect the design intent on the Evolve drawings

Prepare suitable Reports as required.

Carry out data searches where relevant to a project.

Attend training or technical seminars where considered beneficial.

Procure surveys where necessary.

Monitor changes to Planning Guidelines and their impact on infra-structure design

Company benefits include a rewarding project portfolio with several major clients, hybrid work arrangements, a company laptop and iPhone, increasing leave, maternity and paternity with service, your birthday off, regular socials, as well as clearly defined progression.

This is a unique opportunity that is not to be missed. If you think your experience matches up well, please click apply or reach out to Jamie Will at Calibre Search.

Calibre Search promote equality in the workplace and we welcome applications from all suitably skilled or qualified candidates regardless of their sex, race, disability, religion/beliefs, sexual orientation or age. We act as both an employment agency and employment business.
