Company: Pertemps TM

Location: Cardiff

Category: other-general

Senior Civil Engineer

Salary - £37,000 - £50,000

I am working with a well renowned consultancy based in the Centre of Cardiff, who are looking for a Senior Drainage Engineer to help run their Civils Team.

The company:

The multi-discipline consultancy offers a range of services, including Civil and Structural Engineering and BIM.

They have been running for over 30 years – and have grown sustainably since then, but more noticeably in the last 5-10 years, and the modern offices have a great feel to them.

Sectors:

They cover:

Commercial

Highways

Flood Risk

Education

And more – they have the resources in place to work on any project that they win. They are also looking to branch out into further disciplines in the near future.

Main Responsibilities:

As a Senior Engineer you would be expected to help lead the Infrastructure/Drainage Team, get stuck in with detailed design, and help mentor Junior staff. We need someone who can motivate a team and keep morale high.

Ideally, you would be:

5+ years' experience

Experienced in Leading a small team

Experience with Client Liaison

Experience with Civil3D, MicroDrainage

Have worked with SuDS and SAB applications

Projects:

Their projects vary from Water Main bursts up to £20 million frameworks from a mix of Private and Public Sector Clients, waste to energy plants and the transition of Airfields into correct use.

This is a great opportunity for someone to take the next step in their career, or solidify their knowledge in a new role.

If you are interested – get in touch!
