Senior Remote Sensing Data Scientist 100% Remote - £70-80K My client is looking for a Senior Data Scientist that wants to design and push boundaries in the Remote Sensing and Environmental space using Python, Deep learning/ML and Neural networks and ideally some experience practically developing learning in Computer Vision. Our client's mission is to empower efforts to heal ecosystems globally. We champion biodiversity and natural habitat restoration, fostering positive impacts for landowners, businesses, governments, and communities. Their mission is to tackle climate change through innovative, nature-based solutions.

**Key Skills:** Python background and within PyTorch (Computer Vision) knowledge of deploying Cloud Services (AWS preference) Code Quality and well tested approach & any Linux knowledge is good to have. Some exciting areas you will be accountable for; - and implementing Environmental products based on Remote Sensing, and able to move across Domains and understand requirements, whether business or Ecology. background in Deep learning apps for Computer Vision (Jax etc) on Software Dev Skills and drive success about Clear, clean and scalable code. If you fancy doing something ethical and ecology focused, on the cutting edge of ML/AI and Computer vision and be part of a super passionate team then there are so many exciting parts to this Remote based role, and I would love to discuss further.
