Access to our comprehensive flexible benefits including discounts on big brands, wellness and employee assistance programmes, gymflex, buy and sell annual leave, travel and dental insurance

Work. Life. Smarter. Our commitment to a flexible and hybrid working culture

Must Haves

Expert technical knowledge in DevOps applications and processes

A proven track record delivering high-performance, high-availability systems

Experience of Agile project methodologies, supporting effort estimations, leading spike activities and delivering presentations

A passion for advocating DevOps methodologies and mentoring other staff on best practices

At least 4 years of commercial experience delivering services on AWS

Strong knowledge of writing Terraform and/or other IaC technologies

Experience creating CI/CD pipelines

Experience in AWS networking

Experience in at least one programming/scripting language, preferably Python and Bash shell scripting

Key responsibilities:

Instrumental in supporting development and deployment of cloud services supporting critical national infrastructure, using Infrastructure-as-Code (IaC)

Responsible for maintaining, supporting and enhancing existing services; with a key focus on cost, reliability and security

As the subject matter expert, you will be working closely with other teams to design solutions and produce low level designs

Contribute to innovation and continuous improvement, both small and large, inside the team and throughout the business

Being an expert in DevOps you will be a strong advocate for DevOps methodologies, representing the team to stakeholders, and enforcing best practices

Mentor members of the team on their technical skills, peer review code commits, and provide training.

Potential secondment to project specific scrums to provide DevOps leadership within that project

Provide third line operational support and maintenance for existing and new applications

within agreed service levels
